

MAHARAJA INSTITUTE OF TECHNOLOGY MYSORE
An Autonomous Institution, Affiliated to VTU, Belagavi
BELAWADI, SRIRANGAPATNA TALUK, MANDYA-571477

One Week

Faculty Development Program on

**“AI in Civil Engineering: Smart Applications,
Sustainable Infrastructure and Research
Excellence”**

from

24th August to 29th August 2026

Mode: Offline (Hands on)

Organized by:

Department of Civil Engineering

in collaboration with

IGS Student chapter MIT Mysore

and

Getskilled™

A Campus Skilling Initiative by Gyaankool Research Labs Pvt. Ltd.

FDP Dates:

24th August to 29th August 2026

**Deadline for Registration: 20th
August 2026**

Program Schedule

Day	Topics Covered
Day 1	AI Applications in Smart Civil Engineering Structural health monitoring; computer vision for site/pavement inspection; geotechnical & transportation AI.
Day 2	AI Use-Cases Across Civil Engineering Prediction & classification; predictive maintenance; practical civil engineering case studies.
Day 3	AI for Sustainable Infrastructure Climate resilience; disaster/flood risk; green building; carbon estimation; smart water; digital twins.
Day 4	AI-Enabled Teaching, Research & Publication OBE course design; AI literature review; technical writing; research productivity; grant/proposal drafting.
Day 5	AI & Data Analytics for Civil Engineers Python/data analytics; ML basics; predictive modelling; integrated workflow; mini-capstone.

Registration

Registration fee: ₹250/-

Location

Let's Start!

Objectives

1. Understand AI, ML and data analytics for Civil Engineering.
2. Apply AI to structural, geotechnical and transportation problems.
3. Explore AI for climate resilience, flood/disaster risk, green buildings, carbon estimation, smart water and digital twins.
4. Use AI for OBE teaching, literature review, technical writing and research/grant proposals. Develop predictive models and complete a mini-capstone.

AI is becoming a core competency across engineering. In Civil Engineering it supports structural health monitoring, computer vision, geotechnical prediction, transportation systems, sustainable infrastructure, smart water management and AI-assisted research. This FDP is specifically designed for Civil Engineering faculty, emphasizing applied fluency through real engineering problems. The workshop aims to introduce Civil Engineering faculty members to the fundamentals and practical applications of Artificial Intelligence (AI) and Machine Learning (ML) in modern engineering. It focuses on developing applied understanding through real-world Civil Engineering problems, covering areas such as structural health monitoring, computer vision, geotechnical engineering, transportation systems, sustainable infrastructure, smart water management, and construction. The programme also aims to provide hands-on exposure to AI/ML tools and techniques for data analysis, prediction, classification, optimization, and image-based applications. Furthermore, the workshop seeks to enhance the research capabilities of faculty members by demonstrating how AI can support engineering research, teaching, innovation, and interdisciplinary problem-solving, enabling participants to integrate AI-driven approaches into their academic and professional practices.

About Us

Maharaja Institute of Technology Mysore (MITM) was established in 2007 by MET® in a peaceful, sprawling location away from urban disruption. Founded by a group of esteemed individuals in science and Technology, the institute began with 300 seats across five engineering disciplines. Over the years, it has grown to accommodate over 900 students across undergraduate, postgraduate, and research programs. MITM is known for its quality education, "Teaching Centric" approach, and dedicated faculty. The institute focuses on innovation, transparency, and high standards of education, with modern infrastructure and over 50 buses providing transportation within a 60 km radius. Its alumni are well recognized in society and industry.

Our Vision

"To be recognized as a premier technical and management institution promoting extensive education fostering research, innovation and entrepreneurial attitude"

Our Mission

- To empower students with indispensable knowledge through dedicated teaching and collaborative learning.
- To advance extensive research in science, engineering and management disciplines.

Department of Civil Engineering

The Department of Civil Engineering is committed to produce competent, industry-ready civil engineers equipped with strong technical knowledge, professional skills, ethical values, and a sense of social responsibility. The department has a proven record of academic excellence, with five VTU ranks and three gold medals achieved by its students. The sustained efforts of the faculty and students have also contributed significantly to the department's recognition through NBA and NAAC accreditation. The department is supported by excellent infrastructure, including modern laboratories, well-equipped classrooms, and a comprehensive library, along with a team of qualified and experienced faculty members committed to innovative teaching, collaborative learning, and the adoption of emerging technologies. The department also has a distinguished Consultancy Bureau, which provides expertise across various areas of civil engineering and undertakes consultancy assignments for government, semi-government, and private organizations. These activities strengthen the industry-academia interface and provide faculty members and students with valuable exposure to real-world engineering practices.

In addition to the undergraduate programme, the department offers M.Tech programmes in Civil Engineering, with specializations aligned with contemporary infrastructural and technological requirements, including structural engineering and other advanced areas. The department also offers Ph.D. programmes, providing opportunities for advanced research and innovation. Through its strong academic foundation, research orientation, consultancy activities, modern infrastructure, and industry collaboration, the department strives to develop "Complete Civil Engineers" who are technically proficient, professionally competent, socially responsible, and universally employable.

WHO CAN PARTICIPATE?

- ❖ Engineering /diploma Faculty Members
- ❖ Research scholars
- ❖ PG students
- ❖ Industry Professionals
- ❖ AI Enthusiasts

Chief Patron

Dr. Naresh Kumar B.G
President, MET

Patrons

Dr. Murali S
Principal, MIT Mysore

Dr. Vasudev T
Dean, Administration, MIT Mysore

Advisory Panel

Dr. Hemantha Kumar G
Vice President, MET

Dr. Y. T. Krishne Gowda
Secretary, MET

Dr. D. S. Guru
Treasurer, MET

Dr. Chethan H.K
Joint Secretary, MET

Dr. Ananth R. Koppar
Trustee, MET

Convener

Dr. C. Ramakrishnegowda
HOD, Dept. Of Civil engineering

Program Coordinators

Prof. D Ashwini (8496860946)
Assistant Professor, Dept. of Civil engineering

Prof. Shruthi D G (8553417473)
Assistant Professor, Dept. of Civil engineering

Prof. Bhavyashree B N (8880753661)
Assistant Professor, Dept. of Civil engineering

Prof. Varun S (8660704855)
Assistant Professor, Dept. of Civil engineering

Organizing Committee

Dr. Yashwanth M K
Dr. Avinash Gornale
Dr. Chandrashekar Gowda K N
Dr. Gururaj MH
Dr. Punith N
Dr. Madhu S P
Prof. Ashish Dubay B

Prof. Aniruddha A M
Dr. Shankaregowda
Prof. Achyuth K N
Prof. Manjunatha R N
Prof. RaviKiran L
Prof. Manoj B R
